

115 Years... One Focus

For more than a century, Union Tank Car Company has performed as a leader within the community of builders, lessors, and shippers of railroad tank cars. Full service leasing of tank cars and plastics hoppers for chemical, petroleum, and food shippers has always been our priority. Personalized service is our signature.

UTLX continues to invest in tank car design, production technology, and manufacturing capacity. At the same time, streamlining the efforts of our North American network of shops, On-Site® mini-shops, and mobile units has shortened out-of-service time and will enable compliance with looming qualification deadlines. Innovations like Link-Net® have simplified business processes, reduced transactions, and improved information availability.

We openly partner with our customers to lead the industry and regulators to practical solutions for tomorrow's challenges. We are totally committed to tank car safety and Responsible Care®. We are THE TANK CAR PEOPLE® ... focused on every facet of the tank car and plastics hopper business – so our leasing customers can concentrate on theirs.
